

Genie-Soft

INTERFACE

Genie Backup Manager Home is the most user friendly backup software on the market.

The software's wizard-based functionality and clean intuitive interface takes the mystery out of backup and makes safeguarding data an enjoyable task instead of a "that dreadful thing you have to do every week."

GBM Home also keeps the visually impaired in mind, as it supports Windows visual accessibility options and appearance themes..

COMPREHENSIVE BACKUP SOLUTION

Genie Backup Manager Home V8.0 offers superior yet easy-to-use data protection to desktops, notebooks, and networked systems. It protects the whole system, by backing up your system files, documents and settings, program files, and system state using the latest Preinstalled Environment (PE) 2.0 and also performs data backup for Emails, Desktop, Documents, Media files, Favorites, contacts, files and folders, and much more offering faster and easier recovery ensuring business continuity to any storage device; including the secure and robust Online Service. With this online service, you can backup and store your files anytime anywhere!

For ultimate flexibility, GBM Home offers scripting options that enable users to write custom plug-ins to extend the software's capabilities.

Genie Backup Manager Home 8.0

One Backup Solution For All

GBM Home is a very easy to use yet powerful and flexible software that can back up and restore files, documents, emails, settings, programs and more to virtually any local or remote device. Its newly included Disaster Recovery with the latest Pre-installed environment; PE 2.0, made it the comprehensive system protection software from Windows 2000 to Vista.

It is perfect for users of all computer comfort levels. Novice users will find it easy to create their first backup job in matter of minutes after installing the software, thanks to its intuitive wizard-based user interface, while advanced users will appreciate the software's extended scalability and flexibility, and features.

GBM is also the only backup software on the market that offers unlimited FREE plug-ins, which the user can download or create to extend the capabilities of Genie Backup Manager™.

"I'm kicking myself for not having gone with Genie first! The other one I went with (even with all its praise for it) was a disappointment. Genie Backup Manager really is easy to use and easy on the eyes (and brain) to negotiate. The interface is beautifully designed too. This is the product I'll be sure to tell others about when the subject comes up"

SECURITY

With Genie Backup Manager Home, you can make sure your sensitive data will not fall into unauthorized hands. Secure your eyes-only backed up documents and files with highly secure AES encryption.

AES is the Advanced Encryption Standard. This encryption method is the same level of encryption security used by U.S. governmental organizations to protect their sensitive data.

You can use secondary headings to organize your text and make it easier to read.

AVOIDING SKIPPED FILES

Genie Backup Manager ensures business continuity of all their mission critical data, by backing up opened or used files by other users or applications; leveraging Microsoft's latest Volume Shadow-Copy Service (VSS) framework, to permit consistent backup of open files without the need for additional applications or plug-ins.

Open File Backup agent is a utility that helps GBM capture files that are open, even if they are changing during the backup, without locking users out of the applications or forcing them to log off the network, giving your backup software the ability to protect ALL your mission critical data by giving it access to exclusive, open or in use files. And ensuring business continuity by protecting your data in real time without causing interruptions.

FREE PLUG-INS

Other backup software charge users extra for downloading plug-ins that allow them to backup more items, such as email clients, applications settings, instant messengers, etc...

Genie Backup Manager, however, offer its users unlimited free plug-ins. Meaning that users can download any plug-in available in the Genie-Soft database free of charge and that the database is continuously growing to include more plug-ins.

Users can also, use GBM's scripting options to create new plug-ins, and share them with friends, colleague, and other GBM users.
